

Don't be caught off guard. Eliminate phishing attacks

Whatever entry route a phishing attack tries to take,
Area 1 Horizon™ will find and disable it.

Zero in on attackers—5 to 363 days in advance!

Working with your existing security defenses, Horizon eliminates targeted phishing and social engineering threats before they breach your organization.

- Provides visibility into the earliest stage of attack formation
- Identifies nation-state and commercial attackers
- Disrupts and disables attacks so none reach your edge devices

Now you have the spotlight on every attack vector, so you can eliminate them, no matter what their origin.

Learn about Area 1 Horizon's game-changing protection against phishing.
