

## Zero in and take out socially engineered phishing threats

Right now, countless phishing attacks are speeding toward you. Stop missed phish from placing **ransomware** inside your perimeter.

### End phishing campaigns at the earliest attack cycle stages!

Now Area 1 Horizon™ aggressively extends to the attacker's edge, to track, pursue, and disrupt phishing delivery mechanisms in their formative stages. So ransomware never even arrives.

- ActiveSensors™ monitor phish, exposing their methods, techniques, and infrastructure
- Inline email inspection to detect and halt incoming phishing emails, whether spear-phishing, whaling, spoofing, BEC or others
- Integrates easily with your own anti-spam filters, policy and quarantine setup

Horizon's unprecedented visibility disables emerging threats before they reach your perimeter.
